

# KSEIBI 100mm Diamond Polishing Disc for Granite

From first cut to final polish

Kseibi

## Highlights

- Designed for polishing granite surfaces
- 100mm disc diameter for controlled handling
- Available in grits from #50 to #3000
- Supports multi-stage polishing workflows
- Coarse grits help with early surface preparation
- Fine grits help refine the final finish
- Segmented pad pattern supports even surface contact
- Suitable for progressive scratch reduction
- One format across the full grit range
- Ideal for stone finishing and polishing tasks

## Key Features

- Granite-focused polishing — Made for granite polishing applications where controlled surface refinement is required.
- Full grit progression — Available in #50, #100, #200, #400, #800, #1500 and #3000 to cover multiple finishing stages.
- 100mm working size — The 100mm diameter offers a practical balance of coverage and control for polishing work.
- Segmented diamond pad design — The visible segmented surface helps the disc track across stone while supporting consistent polishing contact.
- Step-by-step finishing — Use lower grits for heavier correction and higher grits for finer refinement and polish development.
