

KSEIBI American Pattern Electrode Holder

Proven American pattern control

Kseibi

Highlights

- American pattern electrode holder design
- Available in 300A, 500A and 800A options
- Top and bottom iron parts for robust construction
- Brass-coated material for dependable performance
- Black nylon handle for a secure grip
- Orange top and bottom covers for protection
- Ridged handle profile aids handling
- Suitable for workshop and fabrication use
- Simple, familiar format for electrode control
- Practical choice for repair and maintenance welding

Key Features

- American Pattern Design — Familiar electrode holder style that supports straightforward handling and controlled electrode positioning.
- Multiple Amperage Options — Available in 300A, 500A and 800A versions to match different welding setups and workloads.
- Iron Parts Construction — Top and bottom iron parts provide a solid, durable structure suited to regular jobsite and workshop use.
- Brass-Coated Material — Brass-coated construction helps deliver reliable contact in a practical, work-ready holder.
- Black Nylon Handle — The black nylon handle offers a comfortable grip, while the ridged shape helps with secure handling during use.
