

Kseibi Engineers' Hammer with Wooden Handle

Forged for controlled, everyday striking

Kseibi

Highlights

- ❑ Forged steel hammer head for dependable strength
- ❑ High-frequency hardened head for repeated striking
- ❑ Black textured coating on the head surface
- ❑ Both sides polished for smooth striking faces
- ❑ Wooden handle offers a traditional, balanced feel
- ❑ Head fixed with black resin adhesive
- ❑ Suitable for workshop, fitting and maintenance tasks
- ❑ Classic engineers' hammer shape for controlled blows
- ❑ Available in weights from 100G to 2000G
- ❑ Selected variants include 300G, 500G, 1000G, 1500G and 2000G

Key Features

- ❑ Forged steel head — The hammer head is forged steel, giving the tool the solid build needed for regular professional striking work.
- ❑ High-frequency hardened — The head is high-frequency hardened to support durability and consistent performance under repeated use.
- ❑ Protected head finish — A black textured coating covers the head, while both sides are polished for smooth, practical striking faces.
- ❑ Wooden handle control — The wooden handle provides a familiar grip and balanced handling for accurate blows in workshop and site tasks.
- ❑ Wide weight range — Available from 100G to 2000G, this hammer range helps you match the tool weight to lighter or heavier jobs.
