

Kseibi Flat Cold Chisel with Octagonal Shank

Built for controlled striking

Kseibi

Highlights

- Carbon steel body for durable striking performance
- Black powder-coated finish helps protect the surface
- Flat protruding chisel tip for cutting and removal work
- Octagonal shank offers a stable, solid profile
- Ribbed grip supports better control in the hand
- Wide hand guard helps shield your hand during use
- Suitable for renovation, demolition and workshop tasks
- Available in 250 x 18 mm and 300 x 18 mm
- Designed for repeated hammer-driven chiselling jobs
- Box packed for straightforward storage and supply

Key Features

- Carbon steel construction — Made from carbon steel for the strength needed in repeated striking, cutting and removal applications.
- Black powder-coated finish — The black powder-coated surface adds a protective finish suited to tough working environments.
- Flat chisel tip — A protruding flat chisel tip helps you break, trim and remove material with controlled contact.
- Octagonal shank design — The octagonal shank provides a firm, stable feel that supports confident handling on demanding jobs.
- Guarded grip handle — The handle shown features a ribbed grip and broad guard to improve comfort and help protect your hand.
