

Kseibi Fiberglass Long Tape Measure

Long-distance measuring made practical

Kseibi

Highlights

- White fiberglass tape blade with metric and imperial markings
- ABS plastic housing helps protect the tape in daily use
- Galvanized handle for carrying and handling on site
- Bright orange case is easy to spot while working
- Black outer ring adds protection around the housing
- Suitable for landscaping, layout and construction measuring
- End ring helps anchor the tape for straight measurements
- Available in 15m, 20m, 30m and 50m lengths
- 13 mm tape width across all listed variants
- Supplied in blister card packing

Key Features

- Fiberglass dual-scale blade — The white fiberglass tape blade is marked in both metric and imperial units for flexible measuring across different tasks and preferences.
- Protective ABS housing — An ABS plastic case helps shield the tape during transport, storage and repeated use on demanding jobs.
- Galvanized handle — The galvanized handle gives you a durable, practical grip point for carrying, extending and controlling the tape.
- Made for longer distances — Available in 15m, 20m, 30m and 50m versions, this tape is suited to layouts and measurements beyond standard household tapes.
- Easy-to-spot design — The orange housing with black outer ring stands out clearly on site, helping you find your tool quickly during busy work.
