

Kseibi Ecopro Long Steel Tape Measure

Built for long-distance site measuring

Kseibi

Highlights

- Open-reel long tape for site and outdoor measuring
- Steel tape construction for dependable long-run use
- Durable ABS body handles regular jobsite work
- Yellow rule with metric and imperial markings
- High-visibility orange housing is easy to locate
- Black handle offers a secure, comfortable grip
- Suitable for surveying, layout and boundary checks
- Available in 30M, 50M and 100M options
- 30M and 50M variants use a 13 mm tape
- Plastic shell keeps the tool practical to carry

Key Features

- **ABS Open-Reel Body** — Made with a durable ABS body and plastic shell to handle frequent transport and everyday trade use.
- **Steel Tape Blade** — The steel tape is designed for long-distance measuring where a standard compact tape is not enough.
- **Metric and Imperial Rule** — Yellow rule markings in metric and imperial formats help teams work easily across different measuring preferences.
- **Comfortable Grip Handle** — The black handle is shaped for a confident hold, helping improve control during measuring and rewind.
- **Multiple Length Options** — Choose from 30M, 50M and 100M sizes to match shorter layout jobs or extended measuring tasks.
