

Kseibi Flexible Magnetic Pick-Up Tool

Reach dropped metal parts fast

Kseibi

Highlights

- Flexible steel shaft bends into awkward spaces
- Magnetic tip helps retrieve small metal parts
- Shaped handle offers a comfortable grip
- Useful for garages, workshops and home repairs
- Ideal for screws, nuts, bolts and clips
- Slim head helps access narrow gaps
- Steel construction for everyday durability
- Available in 2LB 20" and 5 LB 24" options
- Helps reduce time spent searching for dropped parts
- Supplied in double blister card packing

Key Features

- Flexible reach — The long steel shaft bends and holds shape to help you reach around obstacles and into confined spaces.
- Magnetic retrieval — Designed to pick up ferrous parts such as screws, bolts, nuts and other small metal items.
- Comfortable handling — The shaped handle gives you a secure hold for better control when guiding the tool into awkward areas.
- Steel construction — Made from steel for dependable day-to-day use in garages, workshops and maintenance settings.
- Choice of sizes — Available in 2LB 20" and 5 LB 24" options so you can match reach and pull strength to the job.
