

Kseibi 1/4" Magnetic Quick-Change Bit Holder

Fast bit changes, secure magnetic hold

Kseibi

Highlights

- 1/4" quick-change shank for fast bit swaps
- Magnetic holder helps keep bits securely in place
- CrV + steel tube construction
- Black-oxide and chrome-plated surface finish
- Available in 60 mm, 100 mm and 150 mm lengths
- Slim profile helps reach recessed screws
- Knurled sleeve supports confident bit changes
- Useful for assembly, fitting and general screwdriving
- Longer lengths help access awkward positions
- Designed for everyday workshop and site use

Key Features

- Quick-change convenience — The 1/4" quick-change shank makes it easy to switch between bits quickly, helping maintain pace on repetitive fastening jobs.
- Magnetic bit retention — A magnetic holder helps keep the bit seated securely for improved handling and more controlled screwdriving.
- Durable material build — Constructed from CrV with a steel tube, this bit holder is made for reliable use across everyday trade and DIY tasks.
- Choice of working length — Available in 60 mm, 100 mm and 150 mm versions, letting you match reach and access to the job at hand.
- Grip-focused design — The knurled front sleeve shown on the holder gives extra grip during manual bit changes for easier handling.

Variants & References

size	Internal Ref.
1/4" 60mm	181859
1/4" 100mm	181874
1/4" 150mm	181879

Specifications

Material	CrV + steel tube
Sleeve style	Knurled quick-change sleeve
Body profile	Hexagonal shaft
Feature	Magnetic
Shank	1/4" quick-change shank
