

Kseibi Polyethylene Traffic Cone with Reflective Collar

Clear hazard marking, day or night

Kseibi

Highlights

- PE construction for practical daily site use
- Reflective collar helps improve visibility
- Bright cone body stands out clearly
- Wide black base supports stable placement
- Ideal for traffic guidance and hazard marking
- Suitable for worksites, warehouses and parking areas
- Easy to position, move and redeploy
- Available in 50cm, 75cm and 100cm sizes
- 50cm variant specified with reflective collar
- Simple way to define temporary restricted zones

Key Features

- Polyethylene body — Made from PE for a practical, durable cone suitable for repeated use in busy work and access areas.
- Reflective collar — The reflective band helps the cone remain noticeable in lower-light conditions and changing environments.
- High-visibility design — The bright cone body and contrasting black base create a clear visual warning that is easy to identify.
- Wide base profile — A broad base supports stable placement on the ground while keeping the cone easy to set out and collect.
- Multiple size options — Available in 50cm, 75cm and 100cm versions so you can choose the right height for different marking tasks.

Variants & References

size	Internal Ref.
