

Kseibi High Carbon Steel Pull-Stroke Saw

Controlled cutting on every pull

Kseibi

Highlights

- Pull-stroke design for controlled, efficient cutting
- High carbon steel blade for dependable hand-saw performance
- Available in 250mm and 265mm sizes
- Fine-tooth blade profile supports neat, deliberate cuts
- Angled handle helps promote a natural wrist position
- Textured grip area aids handling and control
- Black handle shown in the product image
- Hanging hole in handle for easy storage
- Suitable for workshop, site and home repair tasks
- 265mm variant specified with aluminum alloy knife casing material

Key Features

- Pull-Stroke Cutting Action — Designed to cut on the pull stroke for a controlled feel and steady blade tracking through the material.
- High Carbon Steel Blade — Made from high carbon steel for reliable manual cutting performance and a direct, responsive feel in use.
- Two Size Options — Available in 250mm and 265mm versions, making it easier to match the saw to your task and working space.
- Comfort-Oriented Handle Shape — The angled pistol-grip style handle supports comfortable handling and helps improve control during longer cuts.
- Practical Everyday Storage — A hanging hole at the end of the handle makes the saw simple to store between jobs.
