

# Kseibi PROGRIP Steel Half Round File

Shape flat and curved surfaces with one file

Kseibi

## Highlights

- Half round profile suits flat and curved surfaces
- Made from T12 carbon steel
- PROGRIP handle supports a secure hold
- Textured grip helps improve control
- Useful for shaping, smoothing and refining edges
- Ergonomic handle design for hand comfort
- Available in 6" 150mm and 8" 200mm sizes
- Hanging hole allows easy storage
- Suitable for workshop, garage and repair use
- Listed variant supplied in double blister packing

## Key Features

- Half Round Filing Surface — The half round shape is suited to tasks that involve both flat faces and curved profiles, giving you more flexibility with a single hand tool.
- T12 Carbon Steel Build — Made from T12 carbon steel for dependable durability and solid performance in routine shaping, smoothing and finishing work.
- PROGRIP Handle — The handle shown features a contoured PROGRIP design that helps provide a steadier, more comfortable hold during use.
- Easy Handling — A textured grip and ergonomic shape support control when working on edges, contours and detailed fitting tasks.
- Size Options — Available in 6" 150mm and 8" 200mm sizes, so you can choose the length that best matches your work style and application.
