

Kseibi PROGRIP Steel Hand File

Comfort grip. Controlled filing.

Kseibi

Highlights

- Made from T12 carbon steel
- PROGRIP handle supports secure control
- Suitable for shaping, smoothing and deburring
- Rectangular file profile for flat surface work
- Textured handle helps reduce slip in use
- Contoured grip adds comfort on longer jobs
- Available in 6" 150 mm and 8" 200 mm
- Slim file shape helps reach narrow sections
- Handle includes hanging hole for storage
- 8" 200 mm variant supplied in double blister packing

Key Features

- T12 Carbon Steel Build — Made from T12 carbon steel for a durable file body suited to regular shaping and finishing tasks.
- PROGRIP Handle — The contoured handle is designed for a steadier, more comfortable grip during controlled filing work.
- Textured Grip Zones — Textured sections on the handle help improve hold and confidence when guiding the file along the workpiece.
- Flat File Form — The rectangular profile shown is well suited to working flat surfaces, straight edges and general smoothing jobs.
- Size Options — Available in 6" 150 mm and 8" 200 mm sizes to match different working preferences and applications.
