

Kseibi PROGRIP Steel Round File

Controlled filing for curves and contours

Kseibi

Highlights

- Round file profile for holes, curves and internal contours
- PROGRIP handle supports secure, comfortable control
- T12 carbon steel on the listed 8" 200mm variant
- Suitable for shaping, enlarging and smoothing tasks
- Available in 6" 150mm and 8" 200mm sizes
- Contoured handle helps reduce slip during use
- Good choice for workshop, maintenance and repair work
- Slim file shape reaches into narrow curved spaces
- Hanging hole in handle for easy storage
- Double blister packing on the specified variant

Key Features

- Round file shape — Designed for filing curved surfaces, holes and internal contours where a flat file is less suitable.
- PROGRIP handle — The shaped handle provides a more secure and comfortable hold for controlled, repeated filing strokes.
- T12 carbon steel construction — The listed 8" 200mm variant is made from T12 carbon steel for dependable use in routine filing tasks.
- Two size options — Available in 6" 150mm and 8" 200mm sizes to suit different reach and handling preferences.
- Easy workshop storage — A hanging hole at the end of the handle makes it simple to store within easy reach.
