

Kseibi Inox PROGRIP Stainless Steel Taping Knife

Smooth finishing with confident control

Kseibi

Highlights

- Stainless steel construction for dependable finishing work
- Ideal for spreading and smoothing joint compound
- Available in 25cm, 30cm, 35cm, 50cm and 60cm sizes
- Wide blade format helps cover larger areas efficiently
- Smaller sizes offer easier control for patching and detail work
- Central handle placement supports balanced pressure
- Selected variants feature a stainless steel blade head
- Orange and black two-colour handle on selected sizes
- Black TPR grip on selected variants for secure handling
- Suitable for drywall, plaster and filler application tasks

Key Features

- Stainless Steel Build — Made with stainless steel for a clean, practical finishing tool suited to repeated smoothing and spreading tasks.
- Useful Size Range — Offered in 25cm, 30cm, 35cm, 50cm and 60cm options so you can match the blade width to the job.
- PROGRIP-Style Handle — Selected variants include an orange and black plastic-coated handle with black TPR for a steady, comfortable hold.
- Balanced Control — The centrally mounted handle helps apply pressure more evenly across the blade for smoother compound distribution.
- Made for Finishing Work — A practical choice for taping joints, feathering filler, smoothing plaster and refining repaired surfaces.
