

Kseibi Two-Handed Plastering Trowel 14 x 50cm

Wide coverage with two-handed control

Kseibi

Highlights

- 14 x 50cm blade covers larger areas efficiently
- Two-handed wooden handle supports controlled pressure
- High quality tool steel blade for dependable use
- Polished surface helps smooth movement across material
- Available in smooth and notched versions
- Smooth option suits finishing and flattening work
- Notched option helps create an even adhesive bed
- Long handle design improves guidance over wide passes
- Natural-colour wooden handle offers a comfortable grip
- Suitable for plastering, smoothing and tiling tasks

Key Features

- Two-handed handle design — The long wooden handle is shaped for a secure two-handed grip, giving you better balance and control across the full width of the blade.
- 14 x 50cm working size — A broad blade format helps you cover larger sections efficiently, making it easier to spread and level material with fewer passes.
- High quality tool steel blade — Made from high quality tool steel for reliable performance in plastering and surface preparation tasks.
- Polished blade surface — The polished finish supports smoother travel across the work area for clean application and easier finishing.
- Smooth or notched options — Choose the smooth blade for finishing and flattening, or the notched version for forming a consistent adhesive bed.
