

KSEIBI Vacuum Brazed Diamond Core Holesaw

Diamond cutting for tough drilling jobs

Kseibi

Highlights

- Vacuum brazed diamond core holesaw
- Designed for drilling hard materials
- Helps produce clean, accurate holes
- Ideal for installation and renovation work
- Suitable for pipe, fitting and fixing openings
- Available in sizes from 10mm to 100mm
- Core cup design supports controlled cutting
- Durable abrasive diamond cutting edge
- Robust metal body for trade use
- KSEIBI branded professional tool

Key Features

- Vacuum Brazed Diamond Edge — The diamond cutting edge is built for drilling into hard surfaces where conventional hole saws may be less effective.
- Wide Size Selection — Available in diameters from 10mm to 100mm, making it easier to match the holesaw to small or large opening requirements.
- Clean Core Cutting — The core holesaw format is designed to cut neat circular openings for a more accurate finished result.
- Trade-Ready Construction — The solid metal body shown in the image gives the tool a robust feel suited to regular professional use.
- Versatile Jobsite Use — Well suited to installation, renovation and general building tasks involving fittings, fixtures, services and penetrations.
