

Kseibi Rubber Bolt-Down Wheel Stopper

Clear parking control with bolt-down stability

Kseibi

Highlights

- Rubber construction for durable everyday parking control
- Bolt-down design for secure fixed installation
- High-visibility yellow panels aid vehicle positioning
- Helps create a consistent stopping point in parking bays
- Suitable for garages, driveways and commercial car parks
- Low-profile shape shown for clean ground-level placement
- Helps reduce overruns toward walls, kerbs and obstacles
- Available in multiple sizes to suit different layouts
- Carton packed for practical transport and handling
- Ideal for organised, repeatable vehicle parking

Key Features

- Rubber Body — Made from rubber for a tough, practical parking stop that is suited to regular vehicle contact.
- Bolt-Down Installation — Designed to be fixed in place, helping the stopper stay positioned where reliable parking control is needed.
- High-Visibility Marking — Black rubber construction is paired with yellow panels visible in the image to improve driver awareness.
- Choice of Sizes — Available in multiple size options, including 560x160x100 mm and 900x150x100 mm, with an additional 1830X150X100MM option in the range.
- Versatile Parking Use — Suitable for residential, commercial and facility parking areas where defined vehicle stopping points are required.
