

Kseibi Cowhide Leather Welding Gloves #14

Cowhide protection for tough welding work

Kseibi · 441740

Highlights

- Made from cowhide leather for durable jobsite use
- Designed for welding, fabrication and workshop tasks
- Extended cuff helps protect the wrist area
- Black and gray finish for a professional look
- Textured leather surface supports secure handling
- Built to handle abrasion and rough materials
- Reinforced stitched construction for repeated use
- Suitable for maintenance and general metalworking
- Size #14 configuration
- Balanced coverage for hands and lower forearms

Key Features

- Cowhide Leather Build — Constructed from cowhide leather for dependable durability in welding and heavy handling environments.
- Extended Protective Cuff — The long cuff design adds coverage beyond the wrist to help shield against sparks and debris.
- Workshop-Ready Grip — The suede-like leather texture helps you maintain control when handling tools and materials.
- Reinforced Stitching — Visible stitched seams support the glove structure for regular use in demanding tasks.
- Practical Two-Tone Finish — Black and gray styling gives these gloves a clean, professional appearance suited to trade use.
