

Kseibi 40cm Welding Leather Gloves

Extended leather protection for welding work

Kseibi · 441745

Highlights

- 40 cm length helps protect hands and lower forearms
- Leather construction for tough everyday workshop use
- Designed for welding and hot-work applications
- Reinforced palm area for added durability
- Gauntlet-style cuff extends coverage beyond the wrist
- Yellow and black finish for a professional look
- Suitable for fabrication, maintenance and handling tasks
- Helps reduce wear in high-contact areas
- Flexible glove shape supports tool and material handling
- Kseibi branded gloves for trade and workshop use

Key Features

- 40 cm extended length — The long glove profile adds coverage past the wrist to help protect lower forearms during welding and workshop tasks.
- Leather construction — Made from leather material to provide a durable outer layer suited to abrasive working environments.
- Reinforced palm design — The palm area includes darker reinforced sections visible on the glove to support durability in high-wear contact zones.
- Gauntlet-style cuff — The wide cuff shape makes the gloves practical for jobs where extra reach and coverage are important.
- Workshop-ready design — Designed for welding use, while also being suitable for general handling, fabrication and maintenance work.
