

Kseibi 75 cm Polyurethane Warning Post with Chain Holes

Flexible site marking with chain-ready
convenience

Kseibi · 453020

Highlights

- 75 cm height for clear, practical hazard marking
- Polyurethane body for durable everyday use
- Chain holes allow linked barrier setups
- Bright red finish stands out on site
- White reflective bands improve visibility
- Suitable for traffic and pedestrian guidance
- Stable round base supports upright placement
- Useful for construction, parking and maintenance areas
- Works as a single marker or part of a barrier line
- Simple, effective warning control for contractors

Key Features

- Polyurethane Construction — Made from PU for a durable, flexible warning post suited to repeated use in active work environments.
- 75 cm Safety Marker — The 75 cm height provides clear visual guidance for marking restricted zones, routes and temporary hazards.
- Chain-Ready Design — Built with chain holes so you can connect multiple posts and create fast, visible barrier lines.
- Reflective Banding — White reflective bands help the post remain noticeable in varying light conditions for better site awareness.
- High-Visibility Finish — The bright red body is easy to spot, helping drivers, pedestrians and site teams identify marked areas quickly.
