

Kseibi Rubber Bolt-Down Speed Bump 1000 x 350 x 70 mm

Secure traffic calming with bolt-down rubber construction

Kseibi · 453025

Highlights

- 1000 x 350 x 70 mm speed bump for traffic calming
- Rubber construction for durable site use
- Bolt-down design for secure installation
- Black and yellow finish for strong visibility
- Textured surface helps define the crossing point
- Suitable for car parks, yards and access routes
- Helps encourage lower vehicle speeds
- Ideal for contractor and facility applications
- Supplied in carton packing
- Simple solution for fixed traffic management points

Key Features

- Rubber Build — Constructed from rubber for a durable, practical speed-control solution suited to demanding site environments.
- Bolt-Down Fixing — Designed for bolt-down installation to help keep the speed bump securely positioned in use.
- High-Visibility Colour — The black and yellow colour contrast makes the bump easier for approaching drivers to see.
- Traffic-Calming Profile — The raised 1000 x 350 x 70 mm format helps slow vehicles at entrances, crossings and controlled access points.
- Textured Top Surface — A ribbed surface pattern adds clear visual definition and supports tyre contact as vehicles pass over.
