

Kseibi SDS-Plus Pointed Chisel 250mm

Focused impact for precise breaking

Kseibi · 601010

Highlights

- 250 mm length for reach and control
- Pointed tip concentrates force on the work area
- Made from high quality tool steel
- SDS-Plus shank for compatible rotary hammers
- Sandblasted finish for a clean, durable surface
- Ideal for breaking concrete and masonry
- Useful for channel opening and targeted removal
- Slim body helps access tighter working areas
- Quick to fit and secure in SDS-Plus tools
- Supplied in hanging card packing

Key Features

- Pointed Working End — The pointed tip focuses hammer energy into a smaller area for controlled breaking, starting cuts and targeted material removal.
- High Quality Tool Steel — Manufactured from high quality tool steel to handle repeated impact demands in tough chiselling applications.
- 250 mm Overall Length — The 250 mm size offers a practical balance of reach, handling and control for general demolition and chasing work.
- SDS-Plus Shank — Designed for use with SDS-Plus compatible tools for quick installation and reliable retention during operation.
- Sandblasted Surface — The sandblasted finish gives the chisel a consistent surface and a professional look suited to workshop and site use.
