

KSEIBI SDS-Plus Spade Chisel 40 x 250mm

Wide-impact chiselling for fast surface removal

Kseibi · 601030

Highlights

- SDS-Plus spade chisel for compatible rotary hammers
- 40 x 250mm size balances reach and control
- Broad blade helps remove material over wider areas
- Made from high quality tool steel
- Sandblasted surface finish
- Suitable for surface prep and light demolition
- Useful for chasing, scaling and lifting material
- Designed for controlled work in masonry and concrete
- Quick-fit SDS-Plus shank reduces tool change time
- Supplied in hanging card packing

Key Features

- High Quality Tool Steel — Built from high quality tool steel to withstand repeated hammer action in demanding site and renovation tasks.
- Wide Spade Chisel Profile — The broad blade shape helps lift, strip and remove material across a wider surface than a pointed chisel.
- 40 x 250mm Working Size — Provides a useful combination of blade coverage and overall reach for controlled work in confined or open areas.
- Sandblasted Finish — The sandblasted surface gives the tool a clean, practical finish suited to workshop, van or site use.
- SDS-Plus Compatibility — Designed for SDS-Plus machines, allowing quick installation in compatible rotary hammers for efficient workflow.

Specifications by Variant

Specification	601030
Surface finish	Sandblasted
Dimensions	40x250 MM

Material	High Quality Tool Steel
Packing	Hanging Card Packing
