

Kseibi SDS-Plus Holesaw Arbor with HSS Pilot Drill

Secure SDS-Plus drive for larger hole saws

Kseibi · 617025

Highlights

- SDS-plus 4-slot shank for compatible rotary hammer drills
- 5/8" x 18 thread suits compatible larger hole saws
- Includes HSS pilot drill for guided hole starting
- Silver center drill helps reduce wandering on entry
- Designed for stable hole saw mounting and drive
- Useful for installation, maintenance and general drilling
- Quick tool fitting with SDS-plus compatible machines
- Strong arbor body shown with pilot bit installed
- Supplied in double blister card packing
- Practical choice for trade and serious DIY users

Key Features

- **SDS-Plus Shank** — Features an SDS-plus 4-slot shank for use with compatible drills, supporting secure drive and quick fitting.
- **Compatible Thread** — Made with a 5/8" x 18 thread to fit compatible larger hole saws and arbor-mounted cutting setups.
- **HSS Pilot Drill** — Supplied with an HSS center drill that helps guide the cut and improve positioning when starting holes.
- **Controlled Hole Starts** — The pilot drill engages first to help reduce bit wander and make entry more controlled and accurate.
- **Ready for Practical Jobsite Use** — Well suited to routine drilling tasks in installation and maintenance work, with retail-ready blister card packing.
