- Includes 16 mm reducing washer for added compatibility
- Polished surface finish for a clean professional appearance
- Suitable as a replacement blade for diamond cutting tasks
- KSEIBI quality accessory for power tool users

Key Features

- Continuous Rim Edge — The continuous rim design helps deliver smoother, more controlled cuts and is ideal when a clean finish is important.
- Sintered Diamond Construction — Built as a sintered diamond saw blade to provide dependable cutting capability and lasting jobsite utility.
- 125 mm Blade Size — The 125 mm diameter offers a practical size for routine cutting work with compatible power tools.
- Flexible Bore Fitment — A 22.23 mm bore is paired with 20 mm and 16 mm reducing washers to help fit a wider range of suitable machines.
- Polished Finish — The polished surface finish gives the blade a clean, professional look while complementing its robust construction.
