

Kseibi Electroplated Diamond Cup Wheel with M14 Flange 115mm

Diamond grinding with secure M14 fitment

Kseibi · 644063

Highlights

- Electroplated diamond cup wheel for hard-surface grinding
- 115mm wheel size balances coverage and control
- M14 flange for secure mounting on compatible tools
- Full abrasive face supports efficient surface contact
- Spiral segmented pattern helps guide smoother passes
- Rigid metal body for dependable jobsite handling
- Suitable for grinding, levelling and surface prep
- Compact size helps when working in tighter areas
- Designed for contractor and workshop applications
- Simple, practical accessory for repetitive grinding tasks

Key Features

- **Electroplated Diamond Surface** — The wheel uses an electroplated diamond abrasive face for grinding and surface preparation on hard materials.
- **115mm Working Diameter** — Its 115mm size offers a useful mix of manoeuvrability and working coverage for controlled grinding tasks.
- **M14 Flange Fitment** — The integrated M14 flange supports secure attachment to compatible grinders for confident everyday use.
- **Full-Face Abrasive Coverage** — The broad abrasive surface helps maintain contact across the work area for efficient, even passes.
- **Rigid Metal Body** — A solid metal body provides structural support and durability for regular contractor and workshop use.

Specifications

Brand	Kseibi
Product type	Electroplated diamond cup wheel
Mounting	Flange

Specifications by Variant	
Specification	644063
Feature	115xM14
