

Kseibi Aluminum Oxide Sharpening Stone 150 x 50mm #120/240

Two grits, one reliable sharpening stone

Kseibi · 656015

Highlights

- Dual-grit aluminum oxide stone in #120/240
- Coarse side helps restore dull cutting edges
- Finer side supports follow-up edge refinement
- 150 x 50mm size balances control and coverage
- Rectangular block shape is easy to handle
- Suitable for routine tool maintenance
- Solid stone construction for dependable use
- Compact format stores easily in a toolbox
- Simple sharpening solution with no complex setup
- Supplied in blister card packing

Key Features

- Dual-Grit Sharpening — The #120/240 combination gives you a coarse surface for initial edge work and a finer surface for refining the result.
- Aluminum Oxide Material — Made from aluminum oxide for practical, everyday sharpening and consistent abrasion across the stone surface.
- Convenient Working Size — At 150 x 50mm, the stone offers a usable sharpening area while staying compact enough for easy storage.
- Straightforward Block Design — The rectangular stone shape shown in the image is simple to hold and helps maintain steady contact during sharpening.
- Ready to Store or Display — Blister card packing keeps the stone neatly presented and convenient to store before use.

Specifications by Variant

Specification	656015
Material	Aluminum oxide #120/240
Length	150 mm
Width	50 mm

Dimensions	150x50 MM
Feature	Stone
Packing	Blister Card Packing
