

Kseibi 115mm Crimped Wire Wheel Brush, 5/8"-11

Clean metal fast with controlled brushing action

Kseibi · 662315

Highlights

- 115 mm wheel suits efficient surface cleaning tasks
- 0.3 mm steel wire balances flexibility and coverage
- Crimped wire helps maintain even brushing contact
- Ideal for rust removal and general surface prep
- Useful for deburring edges and cleaning weld areas
- 5/8"-11 threaded mount for secure attachment
- Dense wire fill supports consistent brushing action
- Wheel shape covers broader areas quickly
- Visible metal hub and center plate for solid construction
- Bright orange center makes identification easy

Key Features

- Crimped wire construction — The crimped steel wire design provides flexible brushing action, helping the wheel follow uneven surfaces for controlled cleaning and preparation.
- 115 mm wheel diameter — The 115 mm size offers a practical balance of coverage and maneuverability for routine workshop, fabrication and maintenance work.
- 0.3 mm steel wire — Built with 0.3 mm wire to support effective removal of rust, debris and surface contamination without sacrificing brushing reach.
- 5/8"-11 threaded fitment — The threaded arbor connection is designed for a secure, dependable fit on compatible tools, helping reduce setup hassle.
- Versatile prep and cleaning tool — Suitable for deburring, rust removal, coating cleanup and general metal surface preparation across a wide range of maintenance tasks.

Specifications

Center plate color	Orange
Hub type	Hex threaded hub
