Kseibi · 671003

Highlights

- 5-piece jigsaw blade set for routine cutting tasks
- T111C blade pattern for basic wood applications
- HCS construction for dependable everyday use
- T-shank fitting for compatible jigsaws
- Suitable for a 4-50 mm size range
- Clearly marked blades for quick identification
- Aggressive tooth profile shown for fast cutting action
- Practical choice for workshop and home projects
- Good for trimming, shaping and general wood cuts
- Card-packed set for simple storage and handling

Key Features

- Built for Basic Wood Cutting — Each blade is marked for basic wood use, making this set a practical option for general timber and board cutting tasks.
- HCS Blade Material — Made from HCS, these blades are suited to everyday jigsaw work where a reliable, easy-to-use wood cutting blade is needed.
- T-Shank Compatibility — The T-shank design supports secure fitting and quick blade changes on compatible jigsaws, helping reduce downtime between cuts.
- Useful Cutting Range — With a stated size range of 4-50 mm, the blades can cover a variety of common material thicknesses in one convenient pack.
- 5-Blade Value Pack — Supplied as a 5-piece set, it is easy to keep spare blades on hand for repeat jobs in the workshop, on site, or at home.
