

Kseibi T118A T-Shank Jigsaw Blades 5-Piece Set

Built for thin metal cuts

Kseibi · 671018

Highlights

- 5-piece jigsaw blade set for thin metal cutting
- T-shank design for compatible jigsaws
- T118A blade pattern clearly marked
- High carbon steel construction
- Fine teeth shown for controlled cutting
- Convenient box-packed set
- Suitable for workshop spares and replacements
- Clear blade labeling aids quick selection
- Designed for thin metal applications
- Useful for repair, maintenance and fabrication

Key Features

- T118A Blade Pattern — Each blade is marked T118A, making identification simple when selecting the right blade for the task.
- T-Shank Fit — The T-shank design is made for use with compatible jigsaws, helping with straightforward blade changes and secure fitment.
- For Thin Metal — The blade face is marked THIN Metal, indicating the intended application for thinner metal cutting jobs.
- High Carbon Steel Build — Specified in high carbon steel, these blades offer a practical construction for regular jigsaw accessory use.
- 5-Piece Pack — Supplied as a five-piece set, it gives you multiple matching blades for replacement stock or ongoing work.
