

Kseibi S1211K Stainless Steel Reciprocating Saw Blade

Built for Fast, Practical Cutting

Kseibi · 671105

Highlights

- Stainless steel blade construction
- Designed for reciprocating saw use
- Aggressive tooth pattern for rapid cutting
- Long blade profile for extended reach
- Slim shape helps in tighter spaces
- Suitable for replacement or spare stock
- Built for repeated workshop and site use
- Easy-fit reciprocating saw blade format
- Practical choice for trade and DIY tasks
- Visible tooth spacing supports material clearance

Key Features

- **Stainless Steel Build** — Made from stainless steel for a durable, dependable blade body suited to regular cutting work.
- **Reciprocating Saw Compatibility** — Designed in a reciprocating saw blade format for straightforward use with compatible saws.
- **Aggressive Tooth Design** — The prominent tooth pattern supports fast engagement and confident progress through cutting tasks.
- **Long Reach Profile** — The extended blade shape helps when you need extra reach for longer cuts or awkward access.
- **Practical Everyday Performance** — A solid choice for replacement, maintenance stock or routine workshop and site applications.
