

Kseibi S1542K HCS Reciprocating Saw Blade for Wood

Made for fast wood cutting

Kseibi · 671130

Highlights

- HCS construction for wood-cutting tasks
- Designed specifically for wood applications
- Aggressive tooth pattern for fast cutting
- Long blade profile helps reach deeper into material
- Wide gullets assist chip clearance
- Suitable for demolition and rough cutting jobs
- Useful for timber, boards and general wood sections
- Straightforward fit for compatible reciprocating saws
- Good choice for trade and DIY use
- Kseibi S1542K blade shown for wood cutting

Key Features

- Built for wood — The S1542K is clearly marked for wood use, making it a focused choice for timber, boards and general wood-cutting tasks.
- HCS blade material — Made from HCS, this blade is suited to wood applications where a practical balance of cutting ease and flexibility is needed.
- Aggressive tooth design — The coarse tooth pattern shown on the blade helps deliver fast cutting action in wood and other similar site materials.
- Long cutting profile — Its elongated blade shape supports deeper reach into the workpiece, useful for larger sections and rough cutting jobs.
- Jobsite versatility — Suitable for renovation, demolition, maintenance and garden-related wood cutting where quick, controlled cuts are required.
