- 190 mm length offers control and reach
- Made from high quality tool steel
- Black-oxide finish for a durable workshop surface
- Orange plastic-coated handle improves grip
- Useful for maintenance, repair and machine adjustment
- Compact design stores easily in a toolbox
- Designed for secure engagement on pin-access fittings
- Supplied in double blister card packing

Key Features

- Adjustable Working Range — Covers 9.5-27 mm, helping one tool handle different slotted nuts, collars and ring fittings.
- High Quality Tool Steel — Built from high quality tool steel for dependable strength in workshop and maintenance tasks.
- Black-Oxide Finish — The black-oxide surface finish gives the wrench a durable, professional workshop-ready exterior.
- Plastic-Coated Handle — Orange plastic coating improves grip and handling for better comfort and control during adjustment.
- Compact 190 mm Length — The 190 mm size is easy to carry and store while still providing practical leverage for service work.
