- Aluminum oxide abrasive material
- 1/4 inch round shank
- Includes multiple stone profiles
- Useful for shaping and smoothing
- Helps reach curved and detailed areas
- Suitable for general maintenance tasks
- Good for workshop, garage and repair use
- Mounted design for quick tool changes
- Covers broad and precision grinding jobs

Key Features

- 10-piece assortment — Includes a practical range of grinding stones so you can choose the best profile for the job at hand.
- Aluminum oxide material — Built from aluminum oxide for dependable abrasive performance in general grinding and smoothing tasks.
- 1/4 inch round shank — Each mounted stone uses a 1/4 inch round shank for compatibility with tools designed for that size.
- Multiple working shapes — The set includes cylindrical, tapered, pointed, wheel and ball-style forms for varied contact and control.
- Versatile workshop use — Suitable for shaping edges, smoothing surfaces and handling detail work during repair, maintenance and fabrication.
