

Kseibi 20V Max Cordless Work Light Bare Unit

Bright cordless light where you need it

Kseibi · 710266

Highlights

- 20V Max cordless work light for portable jobsite lighting
- 20 W rated output for practical task illumination
- Light output listed at 1500 lm / 2200 lm
- Bare unit supplied without battery or charger
- Adjustable head helps aim light where needed
- Freestanding tubular base offers stable positioning
- Protective frame helps shield the light head
- Ideal for workshops, garages, sites and home projects
- Cordless design reduces reliance on mains power
- Compact floodlight format is easy to move and place

Key Features

- Cordless 20V Max platform — Runs on a 20V Max battery platform, giving you portable lighting for jobs where cables and sockets are impractical.
- Strong task light output — With output listed at 1500 lm / 2200 lm and a 20 W rating, it provides clear illumination for focused work and general visibility.
- Adjustable lighting angle — The side-mounted adjustment point lets you tilt the light head to direct the beam onto floors, benches, walls or work areas.
- Stable freestanding base — A wide tubular stand supports the light securely, helping it stay planted during use on site, in the workshop or at home.
- Bare unit convenience — Supplied without battery or charger, this version is ideal if you already use compatible 20V Max tools and want to expand your setup.
