

Kseibi 20V Max Cordless Coffee Machine Bare Unit

Fresh coffee, no mains needed

Kseibi · 710276

Highlights

- 20V Max cordless coffee machine for mobile brewing
- Bare unit supplied without battery or charger
- 0.24 l water tank for compact personal use
- Brews at 90°C for hot coffee on demand
- Integrated carry handle for easy transport
- Compact body suits jobsite, van or workshop use
- Includes mug that stores neatly in the machine
- Cordless design helps reduce reliance on mains power
- Practical choice for trade, travel and outdoor use
- Removable brewing parts support easy setup

Key Features

- 20V Max cordless convenience — Powered by the Kseibi 20V Max platform, this coffee machine lets you brew away from fixed power points for greater flexibility on site or on the move.
- Bare unit format — Supplied as a bare machine without battery or charger, it is ideal for users who already own compatible Kseibi 20V Max batteries.
- Hot brewing performance — With a brew temperature of 90°C, it delivers properly hot coffee suited to breaks during work, travel or outdoor tasks.
- Portable, compact design — A strong top handle and compact footprint make the machine easy to carry, position and store in work vehicles, workshops or temporary setups.
- Integrated mug and accessories — The included mug fits into the body for a neat all-in-one layout, while the visible removable brewing components help keep use practical and organised.
