

Kseibi 16.8V Cordless Suction Cup Tile Vibrator

Lift, place and bed tiles with one cordless tool

Kseibi · 710435

Highlights

- 16.8V cordless platform for cable-free movement
- Combines suction cup handling with tile vibration
- Helps position and settle tiles with more control
- Wide suction base supports secure tile handling
- Trigger-style grip supports steady one-hand operation
- Useful for wall and floor tile installation
- Top lever visible for suction engagement
- Reduces repeated lifting and manual tile nudging
- Compact working head for easier guiding on the job
- Suitable for professional and serious DIY tiling work

Key Features

- 2-in-1 tile installation function — Combines a suction cup and tile vibration in one tool to help lift, place and bed tiles more efficiently.
- 16.8V cordless convenience — Battery-powered operation lets you work freely without extension leads or cord management slowing the job down.
- Secure suction handling — The wide suction base is designed to grip tile surfaces during pickup, positioning and adjustment.
- Controlled tile bedding — Vibration helps encourage better contact with adhesive and can assist with settling tiles into position.
- Installer-friendly layout — A long handle, trigger grip and visible suction lever support easier handling during repetitive tiling tasks.
