

Kseibi KAL 20V-24 Rapid Charger for 20V Max FLEXPOWER

Rapid charging for your 20V FLEXPOWER system

Kseibi · 710615

Highlights

- Compatible with all 20 V Max FLEXPOWER models
- Rapid charger helps reduce cordless tool downtime
- Single charging port for simple battery management
- 220-240V input supports workshop and site charging
- 50-60Hz input for broad mains compatibility
- Clear LED indicators show charging status
- Slide-on battery dock for quick fitment
- Compact housing suits benches and shelves
- Vented body design supports airflow
- Matches Kseibi cordless system styling

Key Features

- 20V Max FLEXPOWER Compatibility — Designed for use with all models in the 20 V Max FLEXPOWER battery platform.
- Rapid Charging Performance — Provides fast charging support to help keep compatible batteries ready for work.
- Single-Port Simplicity — One charging port keeps operation straightforward and makes battery rotation easy to manage.
- Status Indicator Lights — Built-in indicator lights give a quick visual check of battery charging status.
- Compact, Vented Housing — The compact charger body is easy to place in work areas, with vent-style openings around the casing.
