

Kseibi KAL 20V-24 D Rapid Dual Port Charger

Charge Two. Keep Working.

Kseibi · 710616

Highlights

- Dual charging ports for two compatible batteries
- Made for all 20 V Max FLEXPOWER models
- 20 V output for Kseibi cordless battery charging
- 220-240/50-60Hz input for standard power supply
- Rapid charger design helps reduce waiting time
- Compact low-profile body stores neatly on a bench
- Slide-in battery bays support secure battery placement
- Central status display for quick charging checks
- Ideal for workshop, site, garage, or van use
- Helps keep spare batteries ready between jobs

Key Features

- Dual-Port Charging — Two charging ports let you manage multiple batteries from a single charger, making it easier to keep your cordless tools ready.
- 20 V Max FLEXPOWER Compatibility — Designed for use with all models in the 20 V Max FLEXPOWER battery platform specified by the manufacturer.
- Rapid Charger Format — Built as a rapid charger to help shorten turnaround time and support a smoother workflow during demanding jobs.
- Clear Charge Status Display — The central indicator area gives a quick visual reference so you can monitor charging progress at a glance.
- Compact Work-Ready Housing — The low, wide base is easy to place on a bench, shelf, or work surface without taking over your workspace.
