

Kseibi 125mm 950W Angle Grinder

Compact power for cutting and grinding

Kseibi · 711927

Highlights

- 950W motor for demanding cutting and grinding tasks
- 125mm max disc diameter suits common workshop applications
- 11,000rpm no-load speed for fast material removal
- M14 spindle fits widely used grinder accessories
- 22mm arbor supports compatible disc mounting
- Slim body design helps with control and reach
- Auxiliary side handle improves stability in use
- Wheel guard adds protection around the disc area
- Includes pin wrench for accessory changes
- Supplied with spare carbon brushes for maintenance

Key Features

- 950W corded performance — Delivers the power needed for regular cutting, grinding and surface preparation tasks in the workshop or on site.
- High 11,000rpm speed — The no-load speed supports quick cutting action and efficient grinding across a wide range of general applications.
- 125mm disc capacity — A practical size for balancing cutting depth, handling and versatility on metal fabrication, repair and maintenance jobs.
- M14 spindle compatibility — Uses a common spindle thread for straightforward accessory fitting with compatible discs and attachments.
- Controlled, user-friendly design — The side handle, slim housing and fitted guard help you work with better grip, guidance and confidence.
