

Kseibi 150mm Bench Grinder 150W

Compact grinding power for everyday workshop tasks

Kseibi · 712415

Highlights

- 150W motor for everyday sharpening and grinding
- 2950/min no-load speed for efficient material removal
- 150mm wheel size suits general workshop tasks
- Twin-wheel design for versatile bench use
- Transparent eye shields help maintain visibility
- Adjustable tool rests support controlled grinding
- Compact bench-mounted format saves workspace
- Front power switch for convenient operation
- Suitable for sharpening, deburring and edge cleanup
- 220-240V, 50-60Hz input for standard power supply

Key Features

- 150W Workshop Motor — Provides dependable power for routine sharpening, deburring and light grinding applications.
- 2950/min No-Load Speed — Delivers brisk wheel rotation for efficient edge restoration and surface cleanup.
- 150mm Grinding Wheels — The 150 x 16 x 12.7mm wheel size supports a wide range of general bench grinding jobs.
- Clear Eye Shields — Transparent guards above each wheel help improve visibility while adding user protection.
- Adjustable Work Rests — Supports the workpiece during grinding to help improve guidance and control.

Specifications

Wheel configuration (wheels)	Twin-wheel bench grinder
Eye shields	Transparent
Tool rests	Adjustable
Power switch position	Front-mounted

Specifications by Variant

Specification	712415
Input voltage	220-240/50-60Hz
Rated input power	150 W
No-load speed	2950/Min
Wheel Size	150x16x12.7 MM
