

# Kseibi 200W Detail Sander

Made for corners, edges and detail work

Kseibi · 713000

## Highlights

- 200W detail sander for controlled surface preparation
- 140 x 80 mm sanding surface for practical coverage
- 15,000 sanding movements per minute
- 1.6 mm sanding orbit for consistent finishing action
- Pointed pad shape helps reach corners and edges
- Compact body supports easier one-hand control
- Rear dust bag helps collect sanding debris
- Suitable for wood, paint prep and filler smoothing
- Ideal for furniture, trim, frames and small panels
- 220-240V, 50-60Hz mains-powered operation

## Key Features

- Detail-focused sanding shape — The pointed sanding pad is suited to corners, edges and narrower areas where broader sanders are harder to control.
- Consistent sanding action — With 15,000 sanding movements per minute, the tool is designed to support efficient material removal and surface preparation.
- Controlled finishing — The 1.6 mm sanding orbit helps balance sanding performance with manageable handling for more precise work.
- Useful working area — A 140 x 80 mm sanding surface offers a practical size for trim, furniture parts and general detail sanding tasks.
- Integrated dust collection bag — The fitted rear dust bag helps capture sanding dust during use for a tidier work area and easier cleanup.

## Specifications

|                 |                           |
|-----------------|---------------------------|
| Dust collection | Dust bag                  |
| Switch type     | Top-mounted on/off switch |
