

Kseibi KST 100 V 800W Laser Jigsaw

Guided cutting with corded power

Kseibi · 714010

Highlights

- 800W corded jigsaw for workshop and site use
- Laser guide helps follow the cutting line
- Variable blade speed from 800-3000
- 4 orbital settings for cut control
- 23 mm stroke length for efficient cutting action
- Stable base plate supports steady handling
- Dust extraction outlet helps keep work area clearer
- Clear front guard improves blade visibility
- Guide fence included for parallel cuts
- Supplied with jigsaw blades shown in image

Key Features

- 800W cutting power — The rated 800W input delivers dependable corded performance for routine cutting tasks in the workshop or on site.
- Variable speed control — Blade speed adjusts from 800-3000, helping you tune cutting action for different materials and finish requirements.
- 4 orbital settings — Choose from 4 orbital settings to balance faster cutting progress with the control needed for cleaner results.
- Laser cutting guide — The integrated laser guide helps you stay aligned with your marked line for more confident straight and shaped cuts.
- Work-ready setup — A stable base, visible cutting area, guide fence and the blades shown in the image support accurate, practical day-to-day use.
