

Kseibi 255mm 1800W Mitre Saw

Fast, accurate cuts for trim and timber

Kseibi · 714225

Highlights

- 255 mm blade suits clean crosscuts and angled cuts
- 5000 rpm no-load speed for quick cutting action
- Mitre range from -45° to 45° left and right
- Bevel adjustment from 0° to 45° left
- Ø25.4 mm blade bore matches the specified blade fit
- Clear blade guard helps improve cut-line visibility
- Dust bag included to help collect cutting debris
- Large adjustment handles support easy setup
- Fence and clamp arrangement helps steady the workpiece
- Suitable for trim, moulding, flooring and joinery work

Key Features

- 255 mm Cutting Blade — Fitted for a Ø255 mm (10 inch) blade, giving the saw the size needed for general crosscutting and mitre work in timber and similar jobsite materials.
- 5000 rpm No-Load Speed — The high no-load speed supports fast, efficient cutting performance, helping you move smoothly through repetitive workshop or installation tasks.
- Dual-Direction Mitre Range — Mitre adjustment from -45° to 45° left and right gives you the flexibility needed for common angle cuts, frames, skirting and finishing work.
- Left Bevel Capacity — A 0° to 45° left bevel range allows bevel and compound cutting for trim, mouldings and other detail-focused carpentry applications.
- Visible, User-Friendly Setup — The clear guard, marked angle scales and large adjustment controls shown in the design help make alignment and setup easier before each cut.

Specifications

Dust collection	Dust bag included
Base type	Bench mount
Work support	Side support arms

Specifications by Variant

Specification	714225
No-load speed	5000 rpm
Blade	Ø255 mm (10")
Blade Bore	Ø25.4 mm
Bevel Angle	0° to 45° Left
Mitre Angle	-45° to 45° Left & Right
