

Kseibi KCM 18-255 SD 255mm Mitre Saw

Accurate angled cuts made simple

Kseibi · 714230

Highlights

- 255 mm (10") blade for versatile woodworking cuts
- 5000 rpm no-load speed for fast, clean cutting action
- Mitre range from -45° to 45° left and right
- Bevel range from 0° to 45° left and right
- Clear blade guard helps maintain cut-line visibility
- Integrated dust bag helps collect sawdust as you work
- Side supports assist with longer workpieces
- Front control layout supports easier adjustment
- Carry handle makes repositioning more convenient
- Stable base suited to bench-top cutting tasks

Key Features

- Dual mitre adjustment — Mitre settings from -45° to 45° left and right give you the flexibility for accurate angled cuts on both sides.
- Left and right bevel capability — Bevel adjustment from 0° to 45° left and right helps you tackle compound cuts for trim, moulding and joinery work.
- 255 mm blade format — Supplied blade size is Ø255 mm (10"), offering a practical balance of cutting capability and control for everyday jobs.
- High no-load speed — A 5000 rpm no-load speed supports smooth cutting performance for general workshop and site applications.
- Work-ready saw layout — The visible dust bag, clear guard, side supports and carry handle help improve usability, visibility and day-to-day handling.

Specifications

Dust collection	Integrated dust bag
Blade guard	Transparent
Support arms	Left and right extension supports
Handle	Top carry handle
