

Kseibi KLM100 100m Laser Distance Measure

Measure up to 100 m with confidence

Kseibi · 715760

Highlights

- 100 m measuring range for long-distance jobs
- Measuring accuracy rated at +/- 1.5 mm/m
- Class 2 laser for everyday measuring tasks
- Clear backlit digital display for easy reading
- Compact handheld design for easy carrying
- Simple keypad layout for quick operation
- Includes carry pouch for protection and storage
- Supplied with batteries for immediate use
- Wrist strap helps keep the unit secure
- Suitable for site, workshop and home projects

Key Features

- Long measuring reach — Measures distances up to 100 m, making it suitable for room layouts, installations, estimating and general site measuring.
- Reliable measuring accuracy — Specified measuring accuracy of +/- 1.5 mm/m helps deliver dependable readings for everyday professional and DIY tasks.
- Clear digital screen — The illuminated display shown on the unit makes readings easier to check while working indoors or in lower-light conditions.
- Portable job-ready kit — Comes with batteries, a wrist strap and a fabric carry pouch, so it is easier to store, carry and use straight away.
- Straightforward controls — Large front buttons for distance measuring, menu access, clear off and value adjustment support quick, practical operation.
