

Kseibi KPW 1500 Pipe Welding Tool 750/1500W

Adjustable heat for reliable pipe welding

Kseibi · 716400

Highlights

- Rated input power: 750/1500 W
- Adjustable temperature from 50-300 °C
- Aluminium heating plate
- Supports 20/25/32/40/50/63 mm sizes
- Designed for plastic pipe welding tasks
- Complete kit format shown in carry case
- Multiple dies visible for size changes
- Handled body for controlled positioning
- Portable setup for site or workshop use
- Organised storage helps keep accessories together

Key Features

- Dual power rating — Rated at 750/1500 W to deliver the heating output needed for practical pipe welding applications.
- Adjustable temperature control — Temperature adjustment from 50-300 °C helps you match heat settings to different pipe welding tasks.
- Aluminium heating plate — The aluminium heating plate supports efficient heat transfer for more even warming of pipe and fittings.
- Covers common pipe sizes — Mounting holes for 20/25/32/40/50/63 mm make the tool suitable for a useful range of standard jobs.
- Portable kit arrangement — Shown with dies, accessories and a metal carry case for organised storage and easier transport between jobs.
