

Kseibi KDA 15-24 24L 2HP Air Compressor

Portable air power for everyday workshop jobs

Kseibi · 716700

Highlights

- 24L tank suits routine garage and workshop tasks
- 2HP compressor format for practical everyday air supply
- Delivers 180 l/min suction power
- 95 l/min output rate for light pneumatic applications
- Maximum operating pressure of 8 bar
- Twin pressure gauges for quick visual monitoring
- Regulator assembly helps control air delivery
- Wheels and carry handle improve portability
- Horizontal tank design stores neatly in work areas
- Runs on 220-240/50-60Hz power

Key Features

- 24L Tank Capacity — Provides useful stored air for inflation, cleaning and other routine compressed-air jobs without taking up excessive floor space.
- 8 Bar Working Pressure — Offers the pressure needed for a wide range of light workshop and garage applications, from blowing down surfaces to basic air tool use.
- 180 l/min Suction Power — Supports steady air intake for dependable compressor performance during regular intermittent tasks.
- Portable Workshop Design — Integrated wheels and a top handle make the unit easier to move between storage, bench areas and point-of-use locations.
- Clear Gauge and Regulator Setup — Twin gauges and an accessible regulator help you check pressure quickly and adjust output to match the job.

Specifications

Tank format	Horizontal
Mobility	Wheels and carry handle
Pressure gauges	Dual

Specifications by Variant

Specification	716700
Input voltage	220-240/50-60Hz
Suction power	180 l/min
Output rate	95 l/min
Max. operating pressure	8 bar
Noise level (LwA)	96 dB (A)
