

KSEIBI KDA 15-50 Air Compressor 50L 2HP

Portable air power for everyday jobs

Kseibi · 716705

Highlights

- 50L tank supports longer working cycles
- 2HP compressor for general workshop tasks
- 180 l/min suction power for dependable supply
- 95 l/min output rate for routine air applications
- Max operating pressure of 8 bar
- Twin gauges for clear pressure monitoring
- Regulator assembly for controlled air delivery
- Wheeled design for easier transport
- Carry handle helps with positioning and movement
- Protective motor cover shields key components

Key Features

- 50L Receiver Tank — The 50L tank offers a practical balance of capacity and footprint, helping reduce frequent cycling during everyday air tasks.
- 2HP Workshop Performance — Built around a 2HP configuration, this compressor is suited to inflation, cleaning and general compressed air work.
- Useful Air Delivery — With 180 l/min suction power and 95 l/min output rate, it provides steady air flow for routine workshop and garage applications.
- 8 Bar Maximum Pressure — A maximum operating pressure of 8 bar gives you the pressure needed for a broad range of common pneumatic jobs.
- Portable, Easy-to-Read Layout — The wheeled tank, carry handle, regulator and twin gauges make the unit easier to move, set and monitor during use.

Specifications

Tank capacity	50
Power	2
Pressure gauges	2

Specifications by Variant

Specification	716705
Input voltage	220-240/50-60Hz
Suction power	180 l/min
Output rate	95 l/min
Max. operating pressure	8 bar
Noise level (LwA)	96 dB (A)
