

Kseibi KWP 50 50mm Gasoline Water Pump

Portable pumping power where you need it

Kseibi · 716920

Highlights

- 50 mm (2 inch) port suits high-volume water transfer
- Maximum capacity up to 30 m3/hr
- Pump lift up to 23 m for effective discharge
- Suction height up to 7 m
- Gasoline-powered for use away from electrical supply
- Protective tubular frame helps guard key components
- Compact open-frame layout aids transport and positioning
- Ideal for drainage, irrigation and tank filling
- Visible hose connections support quick setup
- Supplied with a suction strainer shown in the image

Key Features

- High-Flow 50 mm Port — The 50 mm (2 inch) port diameter supports efficient water movement for demanding transfer tasks.
- Strong Pumping Performance — With pump lift up to 23 m and suction height up to 7 m, it is built for practical site and field pumping jobs.
- Gasoline-Powered Mobility — The petrol engine allows operation in remote or outdoor areas where electrical power is unavailable.
- Protective Carry Frame — A full tubular frame surrounds the pump and engine assembly to help protect components during handling and transport.
- Ready for General Water Transfer — Suitable for drainage, irrigation, trench dewatering and tank filling, with a strainer shown for cleaner suction intake.

Specifications

Frame type	Tubular protective frame
Starter type	Recoil pull-start
Included accessory	Suction strainer

Specifications by Variant

Specification	716920
Port Dia.	50 mm(2inch)
Pump Lift	23m
Suction Height	7m
Max Capacity	30m3/hr
